

Romeran Rodriguez

Maracaibo, Venezuela • [Portfolio](#) • [linkedin](#) • +584126923306 • romeran14@gmail.com

FullStack Developer with 5 years of work experience in Web development. Knowledge in the following technologies: React Js, Next js, React Native, Typescript, Git, Laravel, Nest.js and MySQL.

PROFESSIONAL EXPERIENCE

Bitnat Redes y Sistemas

FullStack Developer

Maracaibo, Venezuela

March 2023 – July 2025

Main Tasks Overview:

- Web application development primarily using React with TypeScript and Next.js.
- On the backend side, I focused on Restful API development with Laravel and MySQL, migrating high-traffic systems' legacy codebase from vanilla PHP code to Laravel, while implementing code optimizations.
- Mobile app development using React Native with Expo.

Frontend Activities:

- Design reusable components following solid principles.
- Define the style guide for maintaining homogeneity throughout the project.
- Develop state management, usually Redux and Context API.
- Consume API Rest endpoints using axios or SWR/ReduxQuery and caching data if applicable.
- Create session persistence mechanics.
- Consume WebSockets (Pusher.js/laravel-echo).
- Implement React Router DOM for React apps routing. Next.js file-based routing system.
- Custom Hooks creation for reusable logic.
- Implement refresh token mechanism within retry failed requests with async-mutex.
- Lazy loading of components and routes.
- Server-Side Rendering (SSR) and Static Site Generation (SSG) with Next.js.
- Form Handling: Formik, Yup (for validation).

Backend dev Activities

- Design the database structure (tables, columns, relationships).
- API Rest development.
- Create and run database migrations to define table schemas.
- Define Eloquent models for database tables.
- Use route groups, middleware, and route model binding.
- Implement application logic within controllers. Handle requests, process data, and prepare responses.
- Implement user authentication using Laravel Sanctum.
- Implement server-side form validation using Laravel's validation rules.
- Implement caching for performance optimization (Memcached).
- Unit Tests: Write tests for individual classes, methods, and functions (PHPUnit).
- Create docs using Postman.
- WebSocket development (reverb).
- Task Scheduling (trigger periodical jobs on server).

Android Activities (React Native)

- Use React Native native components.

- React Navigation (Stack Navigator, Tab Navigator, Drawer Navigator).
- Accessing Native Functionalities: Camera, GPS, storage, push notifications.
- Generate builds and development builds on Expo EAS platform.
- Bluetooth classic integration with thermal portable printer.
- Animations (React Reanimated).
- TV app development react-native-tvos.

Tesla Media Group

Frontend Developer

Los Angeles, U.S.

February 2020 – March 2023

Main Tasks Overview:

- Content management, SEO, Site development Friendly web mobile, based on CMS, Template customization.
- PHP, Joomla, JavaScript, JQuery, LESS, BootsTrap, Screaming Frog SEO Spider.

Frontend Activities

- Installing, configuring, and managing Joomla CMS installations.
- Performing Joomla core and extension updates and migrations.
- Customizing existing Joomla templates to match specific design requirements using LESS and Bootstrap.
- Developing custom Joomla templates from scratch, ensuring responsive web design for various devices.
- Optimizing template performance for faster loading times.
- Structuring website content using Joomla's article, category, and menu systems.
- Implementing and managing custom fields for articles and users.
- Ensuring cross-browser compatibility and performance.
- Developing custom Joomla components and modules using PHP for specific functionalities not available off-the-shelf.
- Interacting with Joomla's database layer (JDatabase) for custom data manipulation.
- Implementing custom PHP logic within templates and extensions.
- Implementing on-page SEO best practices within Joomla (meta descriptions, titles, URLs).
- Configuring Joomla's built-in SEO features (SEF URLs).
- Utilizing tools like Screaming Frog SEO Spider for website audits, identifying broken links, duplicate content, and other SEO issues.
- Optimizing website performance (image optimization, caching configurations, minification of CSS/JS).
- Performing regular backups of Joomla websites.
- Manage and add content of WordPress pages.

EDUCATION

Universidad Privada Rafael Belloso Chacín

Diplomado Full Stack Web Developer

The diploma lasted 9 months in which we learned and did exercises about frontend and backend subjects using technologies learned such as: HTML, CSS, Javascript, SQL, PHP, Python, React.js.

Maracaibo, Venezuela

December 2022

La Universidad del Zulia

Mechanical Engineering Degree

Maracaibo, Venezuela

March 2022

Departamento de Idiomas Modernos (LUZ)

Inglés Comunicativo

504 Academic Hours.
